Summary

Software Engineer with 1+ year of hands-on, customer-facing experience building API-driven products, AI-powered features, and chabots. Strong in REST API design and integration, debugging across the full request path, Git-based collaboration, and shipping production features used by real users. Experienced integrating LLM, GenAI, APIs (RAG chatbots, agentic workflows) and now focused on building cross-platfrom Android iOS apps with React Native, TypeScript, hooks, navigation and state management. Uses AI-assisted development tools (Claude, ChatGPT, Github Copilot) to ship faster with fewer defects.

Skills

Programming Languages: Python, SQL
Frameworks: LangChain, LangGraph, Agno, Odoo
Databases: PostgreSQL, MySQL, ClickHouse, Supabase
Developer Tools: Git, GitHub, Swagger
Core Concepts: REST APIs, FAST APIs

Experience

GenAI Engineer – Backend **Sep 2025 – Present** *Tsss Infotech & Infra Pvt. Ltd.* *Python, FastAPI, PostgreSQL, LangChain, LangGraph, Agno, RAG, Google OKF*

- Developed backend services for an analytics-driven reporting platform, resolving issues through debugging and root-cause analysis.
- Evaluated Google's OKF for arranging and retrieving knowledge articles in the VPN chatbot.
- Designed APIs for automated reporting, metadata extraction, analytics workflows, and actionable data insights.

Projects

Backend Developer — Odoo E-commerce Chatbot — Python, Odoo, PostgreSQL, REST APIs

- Developed backend functionalities for an Odoo-based e-commerce chatbot platform, supporting real users interacting with the product.
- Designed and maintained APIs to support chatbot interactions and payment processing, debugging issues across the full request path.
- Worked with database operations to manage customer, order, and transaction information.
- Collaborated with the team to improve chatbot response handling and workflow automation, incorporating feedback from real usage.

Telegram Bot for Bapatla Engineering College — Python, NLP(Natural Language Processing).

- • Developed an intelligent Telegram bot using Python and Natural Language Processing (NLP) to automate college information dissemination and directly resolve user queries.
- • Analyzed user query patterns to improve response accuracy and reduce manual queries by delivering instant, context-aware information.

Awards & Certifications

- **Machine Learning Internship** – ML (2023): Certified in training & testing, data cleaning, data validation,accuracy.

Education

Bachelor of Technology (B.Tech) **Graduated: 2024** *Bapatla Engineering College*
